

KOMMIREDDY MOUNIKA ISWARYA

+91-7672000474 24b01a4275@svecw.edu.in GitHub LinkedIn

Career Objective

Motivated Information Technology student with strong problem-solving skills and hands-on experience in AI, Retrieval-Augmented Generation (RAG), API integration, and software development. Passionate about building impactful applications, learning emerging technologies, and contributing to innovative solutions.

Education

Shri Vishnu Engineering College for Women

2024–2028

B.Tech in Information Technology

CGPA: 9.55

Projects

AI Resume Validator using Retrieval-Augmented Generation (RAG)

GitHub — Ongoing

Python, LangGraph, Gemini API, Vector Search

- Developing a RAG-based system that analyzes uploaded resumes and provides structured feedback on skills, formatting, and completeness based on the uploaded alumni resumes.
- Implemented document parsing and vector search to retrieve relevant resume sections for context-aware analysis.
- Designed an agentic workflow using LangGraph to coordinate retrieval, validation, and response generation.
- Integrated Gemini API to generate AI-powered suggestions for improving resume quality and technical content.

PROGRESSO – Student Coding Activity Tracker

GitHub Repo

Python, Flask, GitHub API, LeetCode API, Codeforces API

- Developed a Flask-based web application to track coding activity across GitHub, LeetCode, and Codeforces platforms.
- Integrated multiple APIs to collect user statistics including repositories, commits, solved problems, and ratings.
- Implemented automated generation of PDF and CSV reports for faculty evaluation.
- Centralized coding analytics across platforms to simplify performance monitoring.

2D Tower Defense Game

GitHub Repo

Python, Pygame

- Developed a Plants vs Zombies inspired tower defense game using Python.
- Implemented object-oriented design for enemies, towers, and gameplay mechanics.
- Integrated collision detection, animations, and event-driven game loops.
- Optimized sprite management to ensure smooth gameplay performance.

CSV-Based Department Record Management Console

Python, CSV Files

- Built a console-based application to manage student records, attendance, and marks.
- Replaced manual registers with structured CSV data storage.
- Enabled quick retrieval and updating of student performance information.
- Improved administrative efficiency for department-level record management.

Achievements

- Open Source Contribution:** Contributed to open-source projects with 6+ successfully merged pull requests during Hacktoberfest 2025.
- Solved **348+** algorithmic problems on LeetCode, strengthening problem-solving and DSA skills.
- Earned **100+ Days Coding Challenge Badge in Leetcode(2025)**.
- Secured **Second Place** in Failathon Hackathon.

Skills

- Programming Languages:** C, C++, Python
- Core Skills:** Data Structures and Algorithms, Problem Solving, DBMS, Operating Systems (Basics), Object-Oriented Programming (OOP)
- Tools & Technologies:** Git, GitHub, VS Code, APIs, Gemini API, Pygame, CSV Data Handling
- Soft Skills:** Communication, Leadership, Teamwork, Time Management
- Languages Known:** English, Telugu, Hindi
- AI/ML Skills:** Retrieval-Augmented Generation (RAG), LangGraph, Prompt Engineering, Vector Search, Document Parsing, Generative AI, LLM Applications

Positions of Responsibility

Member, Institute of Engineering and Technology Club

Technical Interests

Artificial Intelligence (AI), Generative AI, RAG Systems Backend Development Problem Solving, Competitive Programming, Application Development
